# grappus - uitleg design

## Design

Ik heb 8 ontwerpen in Illustrator gemaakt: 4 voor mobile en 4 voor desktop. Mijn website is een one-pager, maar door op één van de vier knoppen in de header links te klikken, verdwijnen de kaarten rechts ervan en worden ze vervangen door nieuwe, afhankelijk van het platform (Android – iPhone – Windows Mobile – iPad). De bedoeling is dat alle informatie weergegeven wordt zonder horizontaal of verticaal te moeten scrollen.

In elk AI-bestand zit een aparte layer met de Gulden Snede, toegepast op mijn ontwerp.

Daarnaast is op een aparte pagina alle buttons met hover-effecten terug te vinden. Het verschil is echter niet zo groot, meestal gaat het om een iets andere en grotere slagschaduw en in het geval van de laatste is de achtergrondkleur iets grijzer.

(de rare gloed rond de cards is een zijeffect van de conversie van AI naar PDF – zoals u kunt zien in de originele ontwerpen moet dit een lichte slagschaduw zijn)

## Schetsen

Ik heb slechts één schets, omdat ik besloten heb mijn ontwerpen voor desktop en mobile hetzelfde te houden (het past volgens mij op beide schermgroottes en ik zie niet in hoe ik het beter zou kunnen positioneren). Het ontwerp voor mobile is hetzelfde als ik geschetst heb, maar dan met alle kaarten onder elkaar in één kolom.

## Wireframes

Het ontwerp van mijn wireframes is ondertussen al voor een deel veranderd, maar heb ik in de grote lijnen wel gehouden.

### BARTY RUN

Party Fun!

ORIGINAL PRICE: \$3.99

Mind-numbing boredom with **occasional stabs of excruciating pain** is how I would sum up my admittedly limited experience with jogging. That's right folks, **running is boring**.

Barty doesn't seem to have that problem as his run involves being chased through a **tropical forest** by pirates, **pink elephants** and swamp-dwelling crocodiles. **Barty Run** is a colorful, **fast-paced jungle adventure** that will keep you amused for hours. My top tip: grab as many bananas as you can.
